

eLearning Inside News—New Publication Offers Quality News and Insights

eLearning Inside News, launched in early 2017, has quickly gained traction as a top source of information in the eLearning sector.

LOUISVILLE, KY, USA, May 9, 2017
/EINPresswire.com/ -- Prioritizing Current eLearning News

The [eLearning industry](#) continues to make headlines as it expands into new markets at a faster pace than ever before. As a result, the market for high-quality eLearning news and insights also continues to expand. [eLearning Inside News](#), launched in January, has quickly gained visibility as a top source of industry news.

“The eLearning market is undergoing a period of rapid growth, but we recognized a gap in quality reporting on these developments, and this is the gap that eLearning Inside News aims to fill,” says Cait Etherington, the site’s senior writer and editor.

In 2017, eLearning is no longer simply something of interest to a niche market. “I’ve been reporting on educational technologies for over two decades, and what’s happening in the eLearning sector now is very new and very exciting,” say Etherington. “In the 1990s, most people in the training and education sectors considered eLearning an extra—something that might supplement what they were doing in traditional classrooms. Now, we’re witnessing a major shift—eLearning is quickly becoming the dominant mode of delivery in workplaces and in higher education. eLearning Inside is excited to be reporting on this huge paradigm shift and to be helping professionals in the field make sense of these changes.”

Features on Innovators in the Industry

In addition to feature articles on current developments in the industry and professional articles exploring the impact of eLearning on specific sectors, eLearning Inside News has a series dedicated to interviewing industry leaders. “There are so many professionals around the globe engaged in

unique [eLearning projects](#), and we want to highlight their work,” explains Etherington.

Insights on the Future of eLearning

eLearning Inside News also offers insights on future directions in the eLearning sector, including the application of augmented reality and virtual reality. As Etherington emphasizes, “No one can know for sure where eLearning is going next, but we’re committed to being there to report on the next big turn when it happens.”
