

# Boeing Approves TRIM® MicroSol® 590XT for Aerospace Manufacturing

*TRIM® MicroSol® 590XT has received Boeing process spec number BAC5440 approval for area 2, which includes machining heat-treated steels*

PERRYSBURG, OHIO, UNITED STATES, May 9, 2017

/EINPresswire.com/ -- Master Fluid Solutions is pleased to report that TRIM® MicroSol® [590XT](#), an advanced-technology, aerospace, semisynthetic microemulsion, in addition to being qualified for areas 5 and 6 of the [Boeing](#) process spec BAC5008, is now also qualified for use in area 2. The approval for Boeing usage area 2 includes machining heat treated steels as described in BAC5008 and BAC5440. Boeing usage area 5 approval includes machining of non-sealant and non-paint parts not described in BAC5008 specification areas 1 through 4, while area 6 includes machining, grinding, or cutting detail parts and assemblies made of titanium alloys. MicroSol 590XT approval can be found in Boeing document PSD 6-137.

TRIM® MicroSol® 590XT - Milling

Heat-treated steels, titanium, and titanium alloys are commonly used in the aerospace industry, including Boeing and their subcontractors. These approvals allow Boeing and their subcontractors to use MicroSol 590XT to machine these high-tech aerospace alloys to make parts for all space and aircraft including the 737, 767, 777, and 787 families of airplanes.

“MicroSol 590XT not only meets the demands of specific aerospace customers, but it is also environmentally and regulatory compliant for the foreseeable future. The expanding Boeing area approvals allows Boeing and its subcontractors to utilize MicroSol 590XT in many more manufacturing operations.” stated Master Fluid Solutions’ Director of Global Aerospace Strategic Business Unit, Monte Dhatt.

MicroSol 590XT improves on the proven performance of previous generations with a robust stability package using environmentally safe ingredients. The formula is a favorite of production managers, environmental advocates, and safety professionals. MicroSol 590XT is free of chlorine, triazine, formaldehyde releasers, phenols, boron, DCHA, and secondary amines. It dramatically extends useful life without the need for tank-side biocides or fungicides. MicroSol 590XT provides superior corrosion inhibition on all ferrous and nonferrous metals and keeps parts and machines very clean to reduce maintenance and production time.

MicroSol 590XT meets the demands of specific aerospace customers. The expanding Boeing area approvals allows Boeing and its subcontractors to utilize MicroSol 590XT in many manufacturing operations.”

*Director of Global Aerospace  
Strategic Business Unit,  
Monte Dhatt*

MicroSol 590XT is low foaming for today's demanding high-pressure, high-volume applications and it provides an optimized combination of cooling and lubricity to titanium, aluminum, steel, stainless steel, and Inconel® machining applications.

#### About Boeing

Boeing is the world's leading aerospace company and the largest manufacturer of commercial jetliners and military aircraft combined. Additionally, Boeing designs and manufactures rotorcraft, electronic and defense systems, missiles, satellites, launch vehicles, and advanced information and communication systems. As a major service provider to NASA, Boeing operates the Space Shuttle and International

Space Station. The company also provides numerous military and commercial airline support services. Boeing has customers in more than 90 countries around the world and is one of the largest U.S. exporters in terms of sales.

About Master Fluid Solutions — November 13, 1951 Master Chemical Corporation is founded. April 12, 2017 Master Chemical changes its name to Master Fluid Solutions. Working closely with the worldwide metalworking community, Master Fluid Solutions develops and markets a full line of specialty cutting and grinding fluids, cutting oils, concentrated washing and cleaning compounds, and rust preventives under the TRIM® and Master STAGES™ brand trademarks. These products are environmentally sound and when used in conjunction with Master Fluid Solutions' XYBEX® fluid management systems, are the most durable and stable fluid products available anywhere today. Master Fluid Solutions is committed to the safety of the people who use our products, the protection of our planet, and the overall impact on our customers' profitability. Master Fluid Solutions serves customers globally. For further information, contact a local distributor, who can be found at <http://www.2trim.us/distributors.php>, call +1 800-537-3365, or visit <http://www.masterfluidsolutions.com>.
