

Computicate PSA launches enhanced integrations for SolarWinds MSP

MIAMI, FLORIDA, UNITED STATES, May 10, 2017 /EINPresswire.com/ -- Computicate PSA, the “hassle-free” Professional Services Automation (PSA) platform for MSPs worldwide, has announced the release of their enhanced integrations for the [SolarWinds®](#) MSP Remote monitoring and management (RMM) offerings.

SolarWinds MSP is a global leader in scalable IT service management solutions, empowering MSPs worldwide to create highly efficient and profitable businesses.

The integration is a free, and standard feature in Computicate PSA's platform and specifically built for the 2 RMM tools that SolarWinds MSP brings to market, the former [MAXfocus](#) and [N-central®](#) products.

“We see that many MSPs today have acknowledged or adopted the concept of streamlining and automating their managed services operations, and use a PSA tool, or have seriously considered implementing one.”

However, more often than not, they are frustrated with the limited features or integrations offered. But mostly with the complexity and (sunk) costs associated with their current PSA solution.

“That is why we provide our customers with ‘hassle free PSA’, in a pay-as-you-go construction, no strings attached and without investment upfront. And more importantly, we enable MSPs to integrate with their tooling of choice, whether it is RMM, CSP, payment software or accounting tools.”

“With these enhanced integrations for SolarWinds MSP, we believe we have provided their customers with an attractive additional PSA option in their ongoing quest to increase efficiency, growth and profit margins, and it is literally a two-step, 5 minute configuration” says Hans van Leerdam, Chief Revenue Officer at Computicate PSA.

About Computicate PSA

Computicate is a 100% SaaS PSA platform used by MSPs worldwide, free of the hurdles of complexity and costs. Whether you are a 1 man shop, or have 100 technicians, Computicate PSA makes your managed services operations streamlined, automated and efficient. Easy to configure, easy to use and built to integrate with your existing tooling and portals. www.computicatepsa.com
