

BEENIUS AND INFOMIR DEFINING SOLUTION FOR ANDROID STB

Beenius and Infomir teamed up to deliver viewer's first choice experience with a set of STBs specifically designed for cable providers and telco operators.

LJUBLJANA, PLEASE SELECT, SLOVENIA, May 10, 2017 /EINPresswire.com/ -- Ljubljana, 2017 – Beenius, a provider of highly advanced Interactive TV platform and Infomir, a company of fast growing technology solutions, teamed up to deliver viewer's first choice experience with a set of set-top boxes specifically designed to meet a demand of cable providers and telco operators for Android technology.

Beenius and Infomir established and proven partnership several years ago, and they continue their successful collaboration also at this year's ANGACOM 2017. Beenius Interactive Platform has joined with the technology partner to cover the needs and demands of cable and telco operators for IPTV, OTT and DVB-x Hybrid solutions.

Beenius focuses on Android TV and Android STB Applications which enables a service provider to offer enjoyable TV experience with the unified look and feel on N-screens using future proof technology. For all cable operators, Beenius introduces Android solution, together with Infomir STBs MAG series that are developed for service providers and telecoms looking for an optimal balance between cost, performance and service delivery.

At Infomir this year they focused on uniting Android OS with 4K video, and so the MAG family become stronger for one new member, an MAG410 set-top box. It is the most efficient set-top box of MAG series with quad-core processor Cortex-A53. MAG410 also has 8 GB flash and 2 GB of operative memory, 3 USB inputs and inbuilt Wi-Fi adapter. MAG410 is Android 6.x OS powered device that provides outstanding performance, video, and audio quality as well as easy integration with Beenius Interactive TV Platform.

While Beenius takes care of viewers and operators with offering the best TV experience by enabling a smooth transition for cable providers from DVB-C to OTT as well as supports service providers with Android STB Applications, Infomir supports operators with their fast growing technology solutions for IPTV and OTT industries with their extended MAG series of STBs.

Visit Beenius at booth P82 in Hall 8 and Infomir at booth A63 in Hall 7 at ANGACOM 2017 and ask for a demo presentations of both companies' products.
