

Renewable Chemicals Market Outlook and Global Forecast to 2021

Global Renewable Chemicals Market Information By Types (Alcohols, Organic Acids, Ketones, Platform Chemicals, Polymers And Others

PUNE, MAHARASHTRA, INDIA, May 10, 2017 /EINPresswire.com/ -- Global Renewable Chemicals Market Information By Types (Alcohols, Organic Acids, Ketones, Platform Chemicals, Polymers And Others) & By Applications (Industrial, Transportation, Food Packaging & Beverage Bottling, Bio-Medical, Fertilizers, Agriculture, Textiles, Environment, Housing, Recreation And Health & Hygiene) - Forecast To 2021

Global <u>renewable chemicals market</u> has seen a prospective growth in the past few years. The several factors which are driving the global market could be considered as abundant & low-cost feedstock, technological innovations, consumer' acceptance for eco-friendly products, government support, growing popularity, and boost for rural economy.

Study Objectives of Renewable Chemicals Market

- To provide detailed analysis of the market structure along with forecast for the next 5 years of the various segments and sub-segments of the Global Renewable Chemicals Market
- To provide insights about factors affecting the market growth
- To Analyse the Global Renewable Chemicals Market based on various factors- price analysis, supply chain analysis, porter's five force analysis etc.
- To provide historical and forecast revenue of the market segments and sub-segments with respect to four main geographies and their countries- North America, Europe, Asia, and Rest of the World (ROW)
- To provide country-level analysis of the market with respect to the current market size and future prospective
- To provide country-level analysis of the market for segment by types and applications
- To provide strategic profiling of key players in the market, comprehensively analysing their core competencies, and drawing a competitive landscape for the market
- To track and analyse competitive developments such as joint ventures, strategic alliances, mergers and acquisitions, new product developments, and research and developments in the Global Renewable Chemicals Market.

Key Findings

- Bioethanol forms 95% of renewable chemicals market
- Polylactic acid (PLA) and polyhydroxyalkanoates (PHA) are the major biopolymers in the market
- Bio-based succinic acid and iso-butanol hold the highest growth potential
- The major factors accelerating the growth of renewable chemicals are the availability of low cost feedstock and the increasing awareness about eco-friendly products
- Performance and cost competitiveness with traditional fuels form the major restraining factors for the renewable chemicals

Key Players

The leading market players in the global renewable chemicals market primarily include Archer-Daniels-Midland Company, Amyris Inc, BASF, Bioamber, Biomethanol Chemie Nederland, Braskem, Cargill, DSM, E. I. DU PONT, Evonik industries and others.

The reports also covers brief analysis of Geographical Region includes: North America

- US
- Canada
- Mexico

Europe

- Germany
- France
- Italy
- Spain
- U.K
- Rest of Europe

Asia - Pacific

- China
- India
- Japan
- Australia/New Zealand
- Rest of Asia-Pacific

Latin America

- Brazil
- Others

Middle East & Africa

The market report for Renewable Chemicals of Market Research Future comprises of extensive primary research along with the detailed analysis of qualitative as well as quantitative aspects by various industry experts, key opinion leaders to gain the deeper insight of the market and industry performance. The report gives the clear picture of current market scenario which includes historical and projected market size in terms of value and volume, technological advancement, macro economical and governing factors in the market. The report provides details information and strategies of the top key players in the industry. The report also gives a broad study of the different market segments and regions.
