

TurnKey Internet, Inc. Receives Privacy Shield Certification

Leading Datacenter and Cloud Hosting Solutions provider TurnKey Internet, Inc. has announced its Privacy Shield certification.

LATHAM, NEW YORK, U.S.A., May 11, 2017 /EINPresswire.com/ -- Leading Datacenter and Cloud Hosting Solutions provider TurnKey Internet, Inc. has announced its Privacy Shield certification.

The EU-U.S. Privacy Shield framework and certification was designed by the U.S. Department of Commerce and the European Commission to provide companies on both sides of the Atlantic with a mechanism to comply with data protection requirements when transferring personal data from the European Union to the United States in support of transatlantic commerce.

“Our Privacy Shield certification reflects our fundamental commitment to protecting our customers and their data,” said Adam Wills, CEO of TurnKey Internet, Inc. He continued, “At TurnKey Internet, we strive to meet the highest levels of data privacy protection. We believe it is critical that we do everything we can to build trust and ensure privacy compliance for all of our global clients.”

The EU-U.S. Privacy Shield replaces the Safe Harbour Agreement after the European Court of Justice declared that it did not meet Europe’s data protection standards. This new framework protects the fundamental rights of anyone in the EU whose personal data is transferred to the United States as well as bringing legal clarity for businesses relying on transatlantic data transfers.

“Our clients from over 150 countries entrust us to securely receive and host their personal data,” says Wills. “This certification highlights our vision of providing the most secure and reliable Cloud Hosting solutions available today.”
