Latest Report on Electronic Flight Bag Market Global Analysis & 2022 Forecast Research Study

An Electronic Flight Bag (EFB) is a device that allows flight crews to perform a variety of functions that were traditionally accomplished by using paper references. In its simplest form, an EFB can perform basic flight planning calculations and display a variety of digital documentation, including navigational charts, operations manuals, and aircraft checklists. The most advanced EFBs are fully certified as part of the aircraft avionics system and are integrated with aircraft systems such as the FMS. These advanced systems are also able to display an aircraft's position on navigational charts, depict real-time weather, and perform many complex flight-planning tasks.

The Global Electronic Flight Bag market is estimated to reach 1.5 Billion USD in 2017. On the basis of region, North America is the largest market segment of Electronic Flight Bag, followed by Europe and Asia Pacific.
