

LogicalDOC Application launched on the Docker platform

LogicalDOC, leading provider of document management solutions for large and mid sized enterprises, is pleased to announce the availability on Docker

CARPI, ITALY, May 23, 2017

/EINPresswire.com/ -- LogicalDOC is a leading name in the document management industry. We recently introduced the LogicalDOC application on the Docker platform. This unique [document management system](#) is currently helping many professionals to beat the worries of wiped out records or misplacing a paper document due to an unforeseen disaster.

The value-driven technological system runs with an automated document management process that delivers with precision. One of the things that LogicalDOC has helped businesses to achieve is that they reduce their overhead cost by cutting out the use of paper.

The [Docker system](#) is akin to a virtualization system that gives the users real-time solution in one pool. This synergy will continue to create huge wins for every stakeholder as it is backed by extensive technological expertise.

We have created a system that helps people to their workspace uncluttered. Our connection with Docker is a testament to our organization's focus."

Marco Meschieri

According to the spokesperson for LogicalDOC, Marco Meschieri - "We have created a system that will help people to their workspace uncluttered. It can be quite cumbersome to carry out reviews and take quick business decisions if there is too much paper in the way. Hence, our seamless solutions help organizations take care of their stationery and overhead cost. We will keep building real time solutions, and our connection with Docker is a testament to our organization's focus."

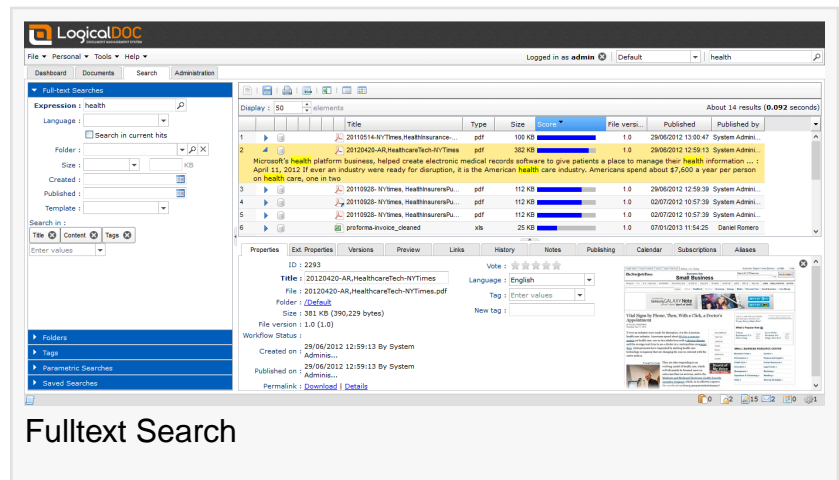

With this dynamic automated system, you can log-in at anytime to follow through on any of your projects with ease. It is cheap, effective and safe for the savvy business owner. The wide range of

The image displays two screenshots of the LogicalDOC application interface. The top screenshot, titled 'Document Preview', shows a document viewer with a sidebar on the left containing a tree view of folders and files. The main area displays a document titled 'Interruttori Detectores' by NISSEN, featuring technical diagrams and text. The bottom screenshot, titled 'Workflow Designer', shows a workflow editor with a sidebar on the left containing various workflow components like 'Start', 'Task', 'Decision', and 'End'. The main area displays a flowchart for 'InvoiceProcessing' with steps like 'Start', 'INVOICE received', 'FUND?', 'YES funds', 'Pay invoice', 'Check the mail', and 'Send check'.

positive reviews that has greeted the introduction of this LogicalDOC solution to the Docker platform is quite impressive. The company is currently carrying out research to build more creative tools that will help to facilitate effective work processes that are backed by robust virtual support.
