tannin market is expected to reach USD 3.39 billion by 2025

expected to reach USD 3.39 billion by 2025, according to a new report by Grand View Research, Inc. Globally increasing demand from the leather industry has been a major factor driving market growth. The utilization of tannin extracts in pharmaceuticals has increased owing to the growing consciousness regarding the medical advantages of tannin-based products.

Tannins are extensively utilized for the production of wine owing to their high anti-oxidation properties. These are used to provide color stabilization of wine and also to provide structural stability. All these factors are expected to benefit the demand for wine applications over the forecast period.

Tannins have mucosal tissues and coagulate proteins, which is useful for soothing skin irritation and pain. Medical tannin based products are utilized for soothing scars on the skin, wounds, sore mouth, minor hemorrhages, burns, and bronchitis.
