[Health Functional Food Market 2017](#)

Executive Summary

Health functional food products aim to enhance and preserve the human health with one or more functional ingredients or constituents. Health functional food products are available in the form of tablets, capsules, powders, granules, pastes, gels, jellies, bars, etc.

The health functional food can be categorized into: sports nutrition, weight management food and dietary supplements and vitamins.

The global health functional food market is projected to increase at a significant CAGR during the years 2015-2020 tremendously. The global health functional food market is expected to increase due to increasing urban population, growth in global aging population, increasing GDP per-capita and increased outbreak of chronic diseases. Yet the market faces some challenges such as, quality control on raw material, ill-defined regulatory framework, etc.
