

# FoxMiners Cryptocurrency Mining Rigs Ready for Delivery

LOS GATOS, CA, USA, May 22, 2017 /EINPresswire.com/ -- Foxminers ( [www.FoxMiners.com](http://www.FoxMiners.com) ), a mining hardware manufacturer, announces the elapse of the pre-order period for its high performance and power efficient F24 and F48 mining equipment. All those who placed orders before 14th May 2017 saved \$500 from the \$2500 price each unit costs. In addition, the manufacturer will take care of the shipping and custom costs.

In total, the company received \$20 million worth of pre-orders. This was from both inside and outside the United States.

## Working around the clock

Despite the huge interest, the company engineers, programmers and designers have been working around the clock. Almost all the units that were pre-ordered are ready and awaiting shipping. The process of shipping begins this week and customers are expected to start receiving their units early next week. Mike Harish, the COO:

“The last few weeks have been demanding for us as a team. We’ve however, managed to meet most of our goals and we are confident to have every unit pre-ordered shipped in time”

Meanwhile, if you missed the pre-order period, Foxminers assures you that the opportunity to get a unit is still available. This will be the case especially once the delivery of the pre-orders is out of the way.

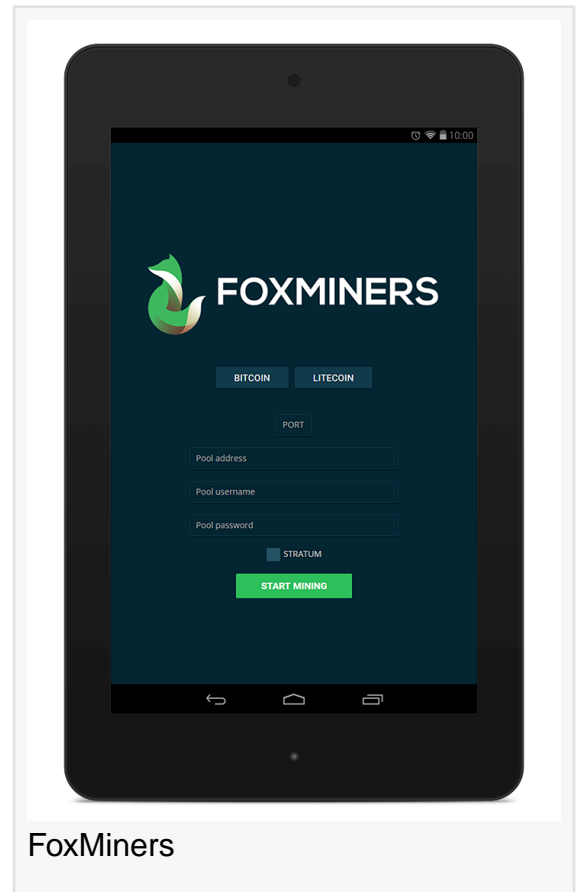

## There is still an opportunity

And while you might not get the discount that the company was offering, the units are still a sound investment. The F24 and F48 mining equipments are built with dual core capability, which makes them faster than any mining rig currently in the market. Mike:

“In particular, the units deliver 75TH/s mining power from an electricity consumption of 1500W. The energy efficiency is improved further by the chips being endothermic-they absorb energy heat from the surrounding rather than give it off.”

FoxMiners has designed the chips with SHA-256 and Scrypt algorithms. Therefore they can mine both Bitcoin and Litecoin. In future, the company plans to design chips for x11 as well.

## About FoxMiners

FoxMiners brings together some of the best engineers, programmers, designers and marketing experts in the blockchain space. The company is registered in California and is headquartered in Los Gatos, CA.
