About Bio-Based Resins

Bio-based resins are synthetic compounds made from renewable raw materials. These resins are different from conventional resins and are used for the manufacturing of various products such as packaging materials, furniture, carpets, films, bottles, cups, and automotive parts. Raw materials required for the production of bio-based resins are sugar cane, wood pulp, soybean, coffee, castor plant seeds, corn, and many other plant-, marine-, and forestry-based materials.

The analysts forecast the global bio-based resins market to grow at a CAGR of 16.19% during the period 2017-2021.
