

IT Governance approved to deliver cyber security services under the UK government G-Cloud 9 procurement framework

ELY, CAMBRIDGESHIRE, UNITED KINGDOM, May 24, 2017 /EINPresswire.com/ -- IT Governance, the leading provider of cyber and information security expertise, has been approved as a cyber security services provider under the UK government G-Cloud 9 procurement framework.

Alan Calder, the founder and chief executive officer of IT Governance, said: "We're delighted to announce that IT Governance's G-Cloud 9 cyber security services and solutions will go live on the Digital Marketplace on 22 May 2017".

"The services IT Governance will be providing under the G-Cloud 9 procurement framework are designed to support public and private sector organisations working with government bodies to implement and certify to various industry standards and achieve compliance with the soon to be enforced General Data Protection Regulation (GDPR) and Network and Information Directive (NIS)."

The UK government G-Cloud 9 framework allows UK government bodies to purchase Cloud services and is designed to facilitate public sector Cloud service acquisition in a quicker and more transparent manner.

The G-Cloud selection process eliminates the need to go through a full tender process as providers are approved by the Crown Commercial Service via the G-Cloud application process. G-Cloud allows suppliers to sell their Cloud services under the categories of Cloud hosting, Cloud software and Cloud support, and all services are available via the Digital Marketplace.

Under the G-Cloud framework for Cloud support, IT Governance will be providing six services: [Cyber Health Check](#), [SOC 2 Readiness Assessment and Remediation](#), [High Level Cyber Audit and Review](#), Incident Management, Technical Assurance and Cloud Security Compliance.

IT Governance supports both public and private sector organisations that deal with the public sector achieve a strong cyber security posture and become compliant with various standards, regulations, frameworks and laws through independent on-site and online consultancy, audits, and vulnerability and readiness assessments.

Having led ISO 27001 implementations and certifications since the Standard was sanctioned, IT Governance has the experience and expertise to provide valuable and tailored advice to meet any organisation's information security and data protection needs.
