PUNE, INDIA, May 23, 2017 /EINPresswire.com/

--

The analysts forecast [the online education market in India](#) to grow at a CAGR of 19.05% during the period 2016-2020.

Online education includes delivery of educational content for distance learning courses through Internet platforms. Service providers are mainly education technology companies, distance learning educational institutions, and traditional universities.

The Indian education system has a growing learner base due to India's large population. Online platforms and other ICT investments in education have begun to shift the focus from passive learning to active and highly engaging learning methodologies. This is aimed at solving one of the most pressing issues of the Indian education system: access to quality education by all learners irrespective of their financial stability or social group.
