Market Research Future

- E. Hoffmann-La Roche Ltd.,
- Genentech Inc.
- Janssen Biotech, Inc.,
- Novartis International AG.
- Pfizer,
- Vical
- Ziopharm.

Regional Analysis:

Melanoma market in the US is divided into states

comprising of Georgia, New Jersey, North Carolina, New York, Florida, Illinois, Ohio, Pennsylvania, Texas, Washington, California, Virginia and Rest of US. California accounts for the largest market for melanoma in US followed by Florida and Ohio.

In the US, California and Florida are key regions for Melanoma market. Large number of melanoma cases is found in this region. New York is third largest market after Florida. In the US the incidence of melanoma is found to be increasing due to indoor tanning. Tanning devices are used in spas, salons, hotels and sporting facilities. Tanning devices emit UV radiations thus increasing the risk of cancer. Technological advancement in the field of treatment and diagnosis of melanoma in the US also drives this market. Government initiatives to tackle these diseases are also important drivers for this market.

US Melanoma Market, By Type, 2016

US melanoma market has been segmented on the basis of type (superficial, nodular, lentigo maligna, acral, polypoid, desmoplastic), by gender (male and female), by treatment (immunotherapy, biologic therapy, radiation therapy, chemotherapy, surgery and others), by diagnosis (ABCDE, ugly duckling, biopsy, and others) and by end users (hospitals, pharmaceutical companies, research centers, clinics, laboratories).

Commenting on the report, an analyst from Market Research Future (MRF) team said “The market for melanoma in US is a developing market and is expected to have remarkable growth and demand in the coming future. This large growth of this market is majorly attributed to increased exposure to ultra violet light and use of tanning devices. Superficial spreading melanoma is a type of melanoma which affects large number of people in the US.”
