- **Conquering a Peptide Optimisation Challenge Using Protein Engineering Techniques and Deliberate Potency Reduction**  
Jonathan Davis, Principal Scientist, Bristol-Myers Squibb  
Case studies on optimising gp41-binding peptide as a component of a tri-functional therapeutic and how final peptide becomes part of a tri-specific biologic therapeutic with picomolar potency and broad spectrum against HIV

- **Optimisation of Peptide Stability**  
Martin Will, Section Head MedChem, Sanofi  
A session on physical and chemical stability, as well as methods for determination of physical and chemical stability of peptides

- **ReadyFlow – A First in Class Coagulant for Controlling Surgical Bleeding**  
Renata Zbozien, Vice President R&D, Haemostatix  
A talk about the unmet needs in the control of surgical bleeding and key factors to determine success including a discussion about HX-P12 peptide, a first in class peptide coagulant.

[Other presentations](#) will focus on crucial topics within the peptides landscape including the extension of half-life and liquid chromatography and mass spectrometry led by experts from UCB, IRBM, Proxima Concepts, Pfizer, Boehringer-Ingelheim, Ipsen, Nestlé Skin Health, Sanofi, Alkermes, Ferring, and more.
