*Enteral Stents Middle East and Africa
Drugs and Companies Pipeline Review H1
2017*

PUNE, INDIA, May 26, 2017

/EINPresswire.com/ -- Summary

Enteral stents are a palliative treatment option for constrictions caused primarily by various cancers. The primary cancers which cause constrictions requiring the use of enteral stents are esophageal cancer, gastric cancer, pancreatic cancer, and colorectal cancer. There are three primary enteral stents; the covered enteral stent, the partially covered enteral stents, and the non-covered enteral stent. The market is led by three key players. The market will continue to grow as cancer prevalence increases and patients become more familiar with enteral stenting as a treatment option. This report examines the enteral stents market in five major Middle East and Africa markets: Egypt, Israel, Saudi Arabia, South Africa, and the UAE.
