

Anti-Asthma Drugs Market is projected to grow to USD 28.3 billion by 2022

anti-asthma drugs market Information, by type of asthma, by asthma trigger type, by drug class, and by route of administration (oral, inhaled)- Forecast to 2022

PUNE, MAHARASHTRA, INDIA, May 26, 2017 /EINPresswire.com/ -- Market Highlights

Market research future published a half-cooked research report on [global anti-asthma drugs market](#). The global anti-asthma drugs market is expected to grow at a CAGR of 5.94 % during the period of 2015 to 2022.

Anti-asthma drugs are used for the treatment of asthma which is a disease of the airways resulting in narrowing and inflammation of air tubes, accompanied by increased secretion, swelling and build-up of tissue fluid characterized by symptoms such as tight chest, wheezing, cough and may be limitation of activity due to difficulty in breathing. As of 2015, almost 300 million people suffer from the disease and the numbers are rising which has been blamed primarily on rising pollution especially particulates.

“

Key Players -
GlaxoSmithKline plc., Merck & Co., Inc., AstraZeneca plc., F. Hoffmann-La Roche Ltd, Teva Pharmaceutical Industries, Novartis International AG, Boehringer Ingelheim,”

Market Research Future

The present market of anti-asthma drugs is valued at USD 18.9 billion in 2015 and is projected to grow to USD 28.3 billion in 2022 representing a CAGR of 5.94 %.

Test the market data and market information presented through more than 60 market data tables and figures spread over 80 numbers of pages of the project report. Avail the in-depth table of content (TOC) & market synopsis on [“Global Anti-asthma Drug Market Research Report - Forecast to 2022”](#).

The developed region anti-asthma drug market is flat and the key will be to tap the huge potential of developing region

market. Thus market diversification will be of prime importance for growth. Another strategy will be development of novel biological anti-asthma drugs which is a drug class of future. Development of

curative anti-asthma drug will be the single most important development and will make the first comer the leader till the patent expires. The uptake of any novel drug will be extremely fast with low marketing cost due to lack of any curative anti-asthma drug.

The market however is fragmented with a number of players and there is good penetration of generics. The loss of patents of some blockbusters such as Advair and Symbicort has numbed the market but these constraints are not enough to hold on for long. Thus taking all these factors together we expect a moderate growth potential of CAGR of 5.94%.

Brief TOC

- 6 Global anti-asthma drugs market, by trigger
 - 6.1 Introduction
 - 6.1.1 Child-onset asthma
 - 6.1.2 Adult-onset asthma
 - 6.1.3 Exercise-induced asthma
 - 6.1.4 Cough-induced asthma
 - 6.1.5 Occupational asthma
 - 6.1.6 Nocturnal asthma

- 6.1.7 Steroid-resistant asthma
 - 7 Global anti-asthma drugs market, by drug class
 - 7.1 Introduction
 - 7.1.1 Bronchodilators (beta agonists, anti-cholinergics, xanthines)
 - 7.1.2 Leukotriene antagonists
 - 7.1.3 Mast cell stabilizers
 - 7.1.4 Corticosteroids
 - 7.1.5 Monoclonal antibody
 - 7.1.6 Others
 - 8 Global anti-asthma drugs market, by therapy
 - 8.1 Introduction
 - 8.1.1 Preventive
 - 8.1.2 Curative
