## [Power Rental Services Market 2017](#)

Power rental services are the additional services which a vendor provides to the client, apart from making a generator and other accessories available for rent. These services enhance the customer satisfaction and reduce the downtime and operational costs incurred due to poor maintenance/planning. The market encompasses services, such as pre-inspection, remote monitoring, fuel management, equipment testing, and contingency planning. Power rental equipment provides essential support to businesses and consumers during power outages. Diesel and gas generators are common forms of this equipment. In addition, power rental generators are being used as base load or as a standby application, depending on the industry needs.

The analysts forecast the global power rental services market to grow at a CAGR of 3.32% during the period 2017-2021.
