DALLAS, TEXAS, U.S.A, May 29, 2017 /EINPresswire.com/

-- The working principle of a spraying and plastering machine is very simple. The plastering machine is composed of a machine body, a plastering trowel, and two uprights that support the machine's upward and downward movements. These uprights are fixed between the roof and the floor and the machine is filled with the premixed material, which reaches the plastering trowel through a conveyor belt. The machine goes up and down against the wall, thus plastering the wall in an efficient manner.
