

Rently Keyless Joins the Z-Wave Alliance

Leading keyless company becomes member of global IoT organization dedicated to furthering the Z-Wave smart home standard.

LOS ANGELES, CA, UNITED STATES, May 31, 2017 /EINPresswire.com/ -- Rently Keyless, the industry's leading innovator in smart home solutions for renters and property managers nationwide, is excited to announce their recent membership with the Z-Wave Alliance.

An organization that promotes the use of Z-Wave smart home protocol across the globe, the Z-Wave Alliance was founded in 2005 and is comprised of industry leaders that are dedicated to the development and extension of Z-Wave as the key enabling technology for smart home and business applications. Roughly 450 companies are part of this growing alliance.

“

We look forward to being part of the Z-Wave Alliance and to helping continue to promote the industry-wide adoption of this truly best-in-class protocol”

Andre Sanchez

Z-Wave protocol is an inter-operable, wireless, RF-based communications technology designed specifically for control, monitoring and status reading applications. Seeing growth in the smart home sector, this protocol is built into every Rently Keyless Hub, which allows their smart home system to incorporate with more than 1700+ devices.

“As a company, we chose Z-Wave because it is very secure, uses very little battery, and is trusted by a large number of companies,” said Andre Sanchez, Division Manager for Rently

Keyless. “In fact, we recently partnered with Yale locks, one of the most trusted and respected lock brands across the globe, which also uses Z-Wave protocol.”

“We are pleased to welcome Rently and their keyless entry solution to our membership,” said Mitchell Klein, Executive Director of the Z-Wave Alliance. “Smart home technology is changing the way renters interact with their homes and property managers monitor and manage their portfolio, and with world class security, strong mesh network capabilities and a large ecosystem of available products, Z-Wave is a perfect solution for the rental market.”

The use of the Z-Wave protocol in Rently Keyless systems means that its devices can seamlessly integrate with other Z-Wave devices and experience no interference from Wi-Fi or other 2.4GHz wireless technologies in similar band.

“We look forward to being part of the Z-Wave Alliance and to helping continue to promote the

industry-wide adoption of this truly best-in-class protocol,” adds Sanchez.

About Rently Keyless

The Rently Keyless smart home system was built from the ground up specifically with enterprise clients in mind. Providing access solutions since 2012, Rently’s technology is utilized by thousands of property managers and millions of renters nationwide. The Rently Keyless software platform allows managers and renters to benefit from smart home technology, without the need for wi-fi.

About the Z-Wave Alliance

Formed in January 2005, the Z-Wave Alliance is a consortium of leading companies in the home technology space dedicated to solidifying Z-Wave as the standard for wireless home control products. Alliance members lead the home controls market, providing leading edge products and systems that deliver increased comfort, convenience, energy conservation, safety and security.
