

Global Digital Pathology Market is Anticipated to Grow at a CAGR of 13.28% During 2017 – 2022

This report covers market characteristics, size and growth, segmentation, regional breakdowns, competitive landscape, market shares, trends and strategies

PUNE, INDIA, May 30, 2017 /EINPresswire.com/ -- Digital Pathology is an image-based information system which uses digitized slides to acquire, manage and interpret pathology information. The global digital pathology market is projected to reach US\$931.599 million in 2022, increasing from US\$440.810 million in 2016 at a CAGR of 13.28%. Factors driving the market are growing need for integration of healthcare systems with hospitals, customers, and laboratories, rising healthcare expenditure across major markets, increase in medical R&D activities globally, rising number of cancer cases, and increasing need for drug discovery and diagnostics. Digitization of healthcare facilities in the form of electronic medical records and laboratory information management systems is expected to bolster further growth. Geographically, North America is projected to dominate the digital pathology market over the forecast period, owing to a rigorous R&D environment, followed by Europe. Asia- Pacific, on the other hand, is expected to witness high growth, benefitting from increasing digitization of processes and technological up gradation in the healthcare sector.
