WiseGuyReports.Com Publish a New Market Research Report On - "Semiconductor Photolithography Equipment 2017 Global Market Expected to Grow at CAGR 9.18% and Forecast to 2021".

Semiconductor lithography also called semiconductor photolithography is a method of fabrication of printed circuit boards (PCBs) and microprocessors. It transfers a circuit image to a silicon wafer by exposing both silicon wafer and photomask to ultraviolet light. It then projects the circuit image on the wafer. It is also called UV or optical lithography. It is a microfabrication technique in which semiconductor circuitry is patterned from the photomask onto a silicon wafer

using a light source, especially UV light. The light source is passed through an ultra-high precision lens in order to obtain fine patterning design.

Covered in this report

The report covers the present scenario and the growth prospects of the global semiconductor photolithography equipment market for 2017-2021. To calculate the market size, the report considers the new sales of photolithography equipment.

The market is divided into the following segments based on geography:

- APAC
- EMEA

### North America

The report, Global Semiconductor Photolithography Equipment Market 2017-2021, has been prepared based on an in-depth market analysis with inputs from industry experts. The report covers the market landscape and its growth prospects over the coming years. The report also includes a discussion of the key vendors operating in this market.

# Key vendors

- Applied Materials
- ASML
- Canon
- Tokyo Electron

# Other prominent vendors

- NuFlare Technology
- SUSS MicroTec
- Ultratech
- Vistec Electron Beam

### Market driver

- Emergence of advanced consumer products
- For a full, detailed list, view our report

# Market challenge

- Cyclical nature of the semiconductor industry
- For a full, detailed list, view our report

### Market trend

- Miniaturization of electronic devices
- For a full, detailed list, view our report

## Key questions answered in this report

- What will the market size be in 2021 and what will the growth rate be?
- What are the key market trends?
- What is driving this market?
- What are the challenges to market growth?
- Who are the key vendors in this market space?
- What are the market opportunities and threats faced by the key vendors?
- What are the strengths and weaknesses of the key vendors?

PART 04: Introduction • Key market highlights

PART 05: Market landscape

- Market overview
- Market size and forecast by revenue
- Market size and forecast by shipment
- Five forces analysis

PART 06: Market segmentation by application

Market overview

PART 07: Market segmentation by light source

Market overview

PART 08: Market segmentation by geography

Global semiconductor photolithography equipment market by geography

PART 09: Decision framework

- Market drivers
- Impact of drivers on key customer segments
- Market challenges
- Impact of challenges on key customer segments

PART 10: Market trends

- Miniaturization of electronic devices
- Automation in automotive industry
- Growing number of fabless companies
