IBS Software Joins the Elite 'Top 100 Logistics IT Provider' Club

IBS Software, has been nominated for its product iLogistics, an integrated end to end logistics management system for upstream oil and gas companies.

HOUSTON, TEXAS, USA, May 31, 2017 /EINPresswire.com/ -- [IBS Software](#), the leading global logistics software provider has been selected as one of the 'Top 100 Logistics IT Provider' for 2017, by New York-based [Inbound Logistics](#) magazine. IBS Software was nominated for its product [iLogistics](#), an integrated end to end logistics management systems for upstream oil and gas companies. The platform provides end to end visibility of people and material movement and optimized asset schedules via air (commercial, charter and helicopter), sea and land, enabling global oil & gas

IBS Software Joins the Elite 'Top 100 Logistics IT Provider' Club

companies achieve operational efficiencies and cost optimization while adhering to health, safety and compliance requirements.

Every April, Inbound Logistics editors recognize 100 global logistics IT companies that support and enable logistics excellence. In 2017, the final shortlist was selected from a pool of more than 300 companies, using questionnaires, personal interviews, and other research. Editors seek to match readers' fast-changing needs to the capabilities of those companies selected. All companies selected reflect leadership by answering Inbound Logistics readers' needs for scalability, simplicity, fast ROI, and ease of implementation.

"IBS Software Services was selected because its solutions solve specific logistics challenges and improve processes, and create a ripple effect of efficiencies across the entire value chain. Inbound Logistics is proud to honor IBS Software for innovative solutions empowering logistics and supply chain excellence in 2017" said Felecia Stratton, Editor, Inbound Logistics.

"This award reiterates the transformation that iLogistics has brought over the years to upstream logistics operations, working with the leading global companies in the oil and gas industry. Our strategy is to add value to our customers by investing in the product roadmap & innovation plug-ins and utilizing the industry's collaborative ecosystem to bring quick ROI. We will continue our efforts to be the de-facto standard for supply chain and logistics across the energy sector, thereby establishing global standards for safer and efficient people & material movement", said Remasankar S, Head, Line of Business - Oil and Gas Logistics SBU, IBS Software.

About Inbound Logistics
Since its inception in 1981, Inbound Logistics' educational mission is to illustrate the benefits of

demand-driven logistics practices, give companies the knowledge to help them match the inbound flow of materials to their demand, and align their business process to support that shift. Inbound Logistics offers real-world examples and decision support to guide businesses to efficiently manage logistics, reduce and speed inventory, and offset rising transport costs, supporting business scalability across their value chain. More information about demand-driven logistics practices is available at www.inboundlogistics.com
