WiseGuyReports.Com Publish a New Market Research Report On - "Consumer Endpoint Security Market Analysis, Strategic Assessment, Trend Outlook and Bussiness Opportunities 2017-2020".

[Endpoint security refers to the protection](#) of the corporate network when accessed remotely from devices such as laptops, PCs, tablets, and smartphones. Endpoint security mainly consists of two components; security software and client software. While security software is centrally located, and is installed on the server, within the network, client software is installed on every external device, and connected to the home network. These servers or gateways verify the log-ins from the endpoints and regularly updates the security software of the device. Consumers use devices like smartphones, tablets, laptops for both personal and professional purposes, making endpoint security solutions an essential tool for securing data.
