

Beyond Security Joins LogPoint as Technology Partner

CUPERTINO, CALIFORNIA, UNITED STATES, June 1, 2017 /EINPresswire.com/ -- Cupertino, CA. June 1, 2017- [Beyond Security](#), a leading provider of automated security testing solutions including vulnerability management announced their technology partnership with [LogPoint](#) - the next-generation security information and event management (SIEM) and big data analytics platform, based out of Denmark, who serves more than 300 customers globally with significant customer base in Europe, including government authorities, organizations and private enterprises.

LogPoint enables enterprises to proactively monitor their networks and rapidly detect and respond to cybersecurity threats and fulfills compliance and regulatory requirements, including auditing guidelines, ISO standards, UK GPG13 and the European Union GDPR.

"An effective SIEM solution is one of the cornerstones of enterprise security and by integrating tools, such as AVDS from Beyond Security, SIEM solutions can increase security for our customers," said Jesper Zerlang, CEO of LogPoint. "AVDS scans results are consolidated and can correlate in our SIEM platform to optimize alerts on cyber events and dashboard the robustness of the customer organization versus vulnerabilities in real time; thus, offering tremendous support," he added.

"Information security is now a key component of national security, corporate survival and personal safety and freedom," said Brian Pearce, Chief Operating Office for Beyond Security. "We feel honored that Logpoint has chosen Beyond Security to accelerate EMEA regulation competencies. Secure computer networks and software products benefit everyone and we hope that the partnership between LogPoint and Beyond Security can continue to contribute to these vital areas", he added.

Beyond Security is a leading worldwide security solutions provider. It's testing tools accurately assess and manage security weaknesses in networks, applications, industrial systems and networked software. Beyond Security's product lines include, AVDS for network vulnerability management and beSTORM for software security testing, which can help secure network and applications and comply with the security policy requirements that exceeds industry and government standards.

Founded in 1999, Beyond Security's solutions are essential components in the risk management program for many organizations worldwide. With the headquarters located in Cupertino, California, Beyond Security's distributors and resellers can be found in North and South America, Europe, Asia, Africa, the Middle East and Australia.
