

OSAI To Exhibit Latest CNC Control and Software at AWFS Show – Booth 8846

CHICOPEE, MA, USA, June 2, 2017 /EINPresswire.com/ -- OPENWood™ is the latest CNC hardware/software solution for woodworking machines from OSAI USA. Designed to optimize startup, productivity and cutting quality, this system offers numerical controls that perfectly match the most common CAD systems on the market, allowing complete programming.

OSAI OPENWood modular CNC components guarantee high productivity and finishing performance for all types of woodworking machines from simple CNC routers to complex machines for panel management as well as processing up to 5 axes machining centers for solid wood processing.

Celebrating 60 YEARS OF OSAI CNCs

OSAI, an Italian manufacturer of CNC controls since 1957 is celebrating 60 YEARS. OSAI an acronym for (Olivetti Systems for Automated Industry) began within the machine tool division of Olivetti and gradually expanded its activity into the international market.

Over time, the group created closer links with Allen Bradley/Rockwell, the American leader in industrial automation until it became a part of the Rockwell Group and changed its name and logo into Rockwell. In 1997, OSAI split from Rockwell and returned to being an independent company, specialized in CNC controls and automation systems.

OSAI continued to build on their previous success, with steady growth over the next ten years in the world of wood, stone, and glass industries. In 2007 OSAI was acquired by the major Italian electronics manufacturer PRIMA ELECTRO S.p.A. and has now become one of the major worldwide CNC and automation system providers. OSAI has expanded their line up to include laser, plasma, and waterjet machines.

OSAI's success comes from a combination of high-tech products and a sales and support organization which is capable of managing the most demanding applications. This capability results partly from its long history in the market, but also from the traditional attitude of its organization, trained not only to react quickly to customer needs, but to anticipate market requirements.

OSAI is backed by 50 years experience providing leading original equipment manufacturers and machine builders with state-of-the-art CNC control solutions. For more information about OSAI's CNC control software, call 413-598-5200, or visit <http://www.osaicnc.com> or email
