

Impartus supports Father's vision to curb after-school tuitions

Impartus' video-based learning platform is helping K12 students with the help of parents to revise what is being taught in the class.

BENGALURU/DELHI(NCR), KARNATAKA, INDIA, June 9, 2017 /EINPresswire.com/ -- Fr. Agnel School is one of the leading K12 schools in Delhi and NCR and is run by Agnel Ashram Fathers. The Agnel society has a chain of reputed institutions well known all over the country for their excellence, efficiency and dedication.

Fr. J. A. Carvalho, principal of the school had the vision to extend the student's learning beyond the classroom hours. If somehow they could record classroom lessons to create educational content, it would enable the students to relearn whatever has been taught in the class on a regular basis, especially before the exams and class tests. Moreover, such content could be reused to educate unprivileged students who don't get an opportunity to attend regular classes as well as for teacher improvement purpose.

Impartus provided an innovative video-based solution to the school to automatically record, manage and distribute the classroom teachings and help students and parents watch them anytime. Parents who want their children to excel academically had to rely mostly on the evening tuitions which charge hefty fees and come as a big hassle for them. With this solution, the video lessons and other material are available directly from the cloud and students can ask questions to the faculty pointing to the particular time of the video where there is a doubt.

"Our teachers are really excited to have their routine classroom sessions get recorded and thereby the automatic creation of high-quality digital content. After carefully observing their videos, they inherently get a self-meaningful feedback and therefore can constantly improve the quality of education. Students are also responding with higher achievement and are excited to learn", says, Fr. J. A. Carvalho, Principal, Fr. Agnel School

"Progressive K12 schools and colleges are taking a lot of initiatives to bring excellence in education and videos are the most important medium, as watching classroom lectures repeatedly drives higher knowledge retention in the students. The interactive video platform which helps in improving student performance is being highly embraced by both parents and teachers", says Amit Mahensaria, Co-Founder, and CEO of Impartus Innovations.

[About Impartus](#)

Impartus provides innovative video learning solutions that drive better outcomes for the education sector. Impartus Lecture Capture is currently being used by over 90+ leading institutions across India such as IIM Bangalore, Shiv Nadar Schools, Amaatra Academy, Fr Agnel Delhi, BITS Pilani, Symbiosis Institute of Business Management, College of Engineering Pune, NIT Surathkal, KMC Manipal, VIT Vellore, SASTRA University and IIIT Bangalore.
