

Humanscale Expands Its Leading Sit/Stand Series

New Additions Offer Even More Choice When Designing Your Workstation

CHICAGO, IL, USA, June 12, 2017

[/EINPresswire.com/](http://EINPresswire.com/) -- Dedicated to promoting activity and wellness in the workplace and home office with its innovative, ergonomic tools, Humanscale introduces two new workstations to its award-winning line of sit/stand solutions.

Understanding that consumers have different work styles and needs, Humanscale created QuickStand Eco and QuickStand Under Desk to appeal to a broader array of consumers and businesses.

QuickStand Eco offers a ready to use workstation at a more affordable price point, while QuickStand Under Desk features an ultra-streamlined design for a clutter-free desktop. With this expanded selection of height-adjustable workstations to choose from, users can have access to comfort and movement in any work environment.

QuickStand Eco – Starts at \$399

QuickStand Eco combines sleek, user-friendly design with expert engineering. This height-adjustable work surface arrives ready to use -- simply remove from the box, place onto the desired surface and start working. A self-locking mechanism provides stability and functionality, so users can alternate positions seamlessly, encouraging more movement throughout the day. With its accessible price point, starting at \$399, and smaller environmental footprint, QuickStand Eco is an economical and eco-friendly sit/stand solution.

QuickStand Under Desk – Starts at \$989

Constantly working to develop products that support the needs of the modern workplace, Humanscale Design Studio created QuickStand Under Desk as an understated workspace wellness solution that blends into any environment. Offering effortless functionality for smooth, seamless transition between sitting and standing, QuickStand Under Desk's patented counterbalance mechanism is enclosed within the framework of a central column and resides beneath the desk surface. When at a seated height, the keyboard tray lies flat against the desktop, and the central column remains hidden for unobstructed views. Like its counterparts in the QuickStand family, QuickStand Under Desk provides built-in cable management for a streamlined, clutter-free look.

Both QuickStand Under Desk and QuickStand Eco are designed to accommodate users of varying heights and can support single or dual monitors up to 35 lbs. in weight. The new solutions are also

QuickStand Eco: A New Sit/Stand Workstation from Humanscale

compatible with Humanscale's innovative sit/stand software, OfficeIQ. QuickStand Under Desk is compatible with Humanscale's best-selling line of monitor arms. They are both built sustainably, with minimal parts and Red List-free materials. Learn more about both at www.humanscale.com/NeoCon
