

Global Radiotherapy Market – Industry Trends and Forecast to 2024

Global radiotherapy market is expected to reach USD 9.3 billion by 2024 from USD 5.2 billion in 2016, at a CAGR of 7.5% in the forecast period 2017 to 2024.

PUNE, MAHARASHTRA, INDIA, June 12, 2017 /EINPresswire.com/ -- The major factors driving the growth of this market are rising incidence of cancer, increasing acceptance of adaptive radiation therapy (ART), growing pool of geriatric population and increasing number of cancer treatment facilities. These factors increase the demand for radiotherapy devices. On the other hand, high cost of radiotherapy equipments and lack of skilled professionals may hinder the growth of the market.

Some of the major factors driving the market for radiotherapy market are increasing patient pool for cancer, increasing ageing population, increase in out-patient cancer facilities and increasing demand for better radiotherapy equipments and replacement of out dated products. One of the major factors for growth of these devices is owing to unmet needs of radiotherapy infrastructure in emerging and developed economies.
