

Wind Turbine Composite Materials 2017 Global Market Expected to Grow at CAGR Of 7.12% and Forecast to 2021

Wiseguyreports.Com Publish New Market Report On-“Wind Turbine Composite Materials 2017 Global Market Expected to Grow at CAGR Of 7.12% and Forecast to 2021”.

PUNE, INDIA, June 12, 2017 /EINPresswire.com/

--

[Wind Turbine Composite Materials Market 2017](#)

The global fossil fuel dependency is expected to cause significant social and economic fluctuations. An economy that is based on fossil fuel is highly unsustainable. The efforts taken to reduce such an impact and reduce its usage and dependence has paved way for alternate and renewable sources of energy. Alternate sources, such as wind energy, is one of the most sought after options since it is the least expensive power generating option.

Increasing number of locations for capacity additions in newer markets such as Africa, Asia, Central, and South America is driving the wind power generation. Both onshore and offshore wind power generation have contributed to the improvement of wind energy's economics in varied operating conditions and wind regimes.

The analysts forecast the global wind turbine composite materials market to grow at a CAGR of 7.12% during the period 2017-2021.

Covered in this report

The report covers the present scenario and the growth prospects of the global wind turbine composite materials market for 2017-2021. To calculate the market size, the report presents a detailed picture of the market by way of study, synthesis, and summation of data from multiple sources.

The market is divided into the following segments based on geography:

- Americas
- APAC
- EMEA

[turbine-composite-materials-market-2017-2021](#)

The report, Global Wind Turbine Composite Materials Market 2017-2021, has been prepared based on an in-depth market analysis with inputs from industry experts. The report covers the market landscape and its growth prospects over the coming years. The report also includes a discussion of the key vendors operating in this market.

Key vendors

- Cytec Solvay Group
- Gurit
- Teijin
- Toray
- TPI Composites

Other prominent vendors

- Axiom Materials
- HC Composite
- Hexcel
- Molded Fiber Glass Companies
- SGL Group
- TenCate
- Vestas

Market driver

- Increasing demand for composite materials for varied blade sizes.
- For a full, detailed list, view our report

Market challenge

- High costs incurred during production of composites.
- For a full, detailed list, view our report

Market trend

- Nanotechnology-based composites.
- For a full, detailed list, view our report

Key questions answered in this report

- What will the market size be in 2021 and what will the growth rate be?
- What are the key market trends?
- What is driving this market?
- What are the challenges to market growth?
- Who are the key vendors in this market space?
- What are the market opportunities and threats faced by the key vendors?
- What are the strengths and weaknesses of the key vendors?

Table of Contents

PART 01: Executive summary
PART 02: Scope of the report
PART 03: Research Methodology

PART 04: Introduction

- Key market highlights
- Global wind turbine composite materials: Supply chain

PART 05: Market landscape

- Global wind turbine composite materials market
- Five forces analysis

PART 06: Market segmentation by resin type

- Global wind turbine composite materials market by resin type
- Global wind turbine composite materials market by thermoset resin type
- Global wind turbine composite materials market by thermoplastic resin type

PART 07: Market segmentation by fiber composite

- Global wind turbine composite materials market by fiber composite
- Global wind turbine composite materials market by glass fiber
- Global wind turbine composite materials market by other composites

PART 08: Geographical segmentation

- Global wind turbine composite materials market by geography
- Wind turbine composite materials market in APAC
- Wind turbine composite materials market in Americas
- Wind turbine composite materials market in EMEA

PART 09: Decision framework

PART 10: Drivers and challenges

- Market drivers
- Impact of drivers on key geographic segments
- Market challenges
- Impact of challenges on key geographic segments

PART 11: Market trends

- Emergence of bio-based products
- Nanotechnology-based composites
- High penetration rate of aramid fibers
