# nTask Dives into Task Management Space with its Beta Launch

In an effort to make tasks, projects and meeting management easier, simpler and more effective, nTask has launched its public beta in the market.

IRVINE, CA, UNITED STATES, June 12, 2017 /EINPresswire.com/ -- nTask – an online task management software proudly announced the public beta release of their product today. With its unique set of features, it is an ideal solution for individuals, professionals as well as enterprises. Not only it is super easy to use, but also it is versatile in its capabilities. It ensures optimal completion of all complex workflows with utmost efficiency. Most task management softwares that exist today are either too complex or way too simple to keep up with the complexity of projects. nTask, on the other hand is developed to serve both needs. It can easily be used as a simple to-do app for getting your daily chores done and fully keep track of them at all times. For professionals & enterprises it solves three major pain points which have the highest impact on any business i.e task management, project management and meeting management.

No matter what your working style is, nTask is developed to keep your workflow simple and feasible. nTask Beta comes with some exciting features, some of which are listed below:

nTask Prioritization – If you have got multiple tasks to deal with, you must prioritize them in order to complete them successfully. nTask is especially designed to address this specific need by allowing you to professionally prioritize all of your tasks, with respect to their criticality.

File Attachments and Sharing – nTask simplifies and improves the collaboration in a team by allowing the team members to upload and share different files and attachments with each other. The entire team can easily access all the important files, anytime and anywhere.

Task Effort and Time Tracking – nTask allows you to maintain and keep a transparent record of all the activities you or your team members performed on a particular task. By using this feature, you can easily identify the time-consuming areas and then can redefine your schedule to improve your productivity.

Schedule Follow up Meetings – These days, scheduling, planning follow ups or reviews, creating tasks is as easy as eating a pie. However, it depends upon the performance of their chosen software. Using Beta product can streamline the workflow. It will never be overwhelming. A person will work in a more effective manner.

Minutes of Meeting – If you want your meeting to be effective, writing down its minutes can be extremely helpful. nTask lets you do so digitally and now you don't need any paper or pencil for that purpose. Just jot down all the important minutes of a meeting and then access them from anywhere you want.

Project Management – nTask makes the project management super easy and stress-free. For an

effective project management, nTask gives you complete control over all the activities of a project so that you can easily supervise and complete it.

Notifications & Alerts – With nTask, you no longer need to be afraid of missing a deadline or an important commitment. By setting an advance notification or alert, you can remind yourself about a particular task or commitment.

About nTask
nTask is a simple online task management software which helps users to easily delegate tasks, manage deadlines, schedule meetings and more. With its built-in meeting module it becomes one of a kind in the task management software space. Now you don't have to juggle around using multiple applications when nTask can get all done within one dashboard.

What to Lookout For?
Task is coming up with some exciting new features and some major enhancements in the design. The highly anticipated post-beta release will be ready in a few months time and nTask will be all set to become a key player in the market. For details on nTask or to learn more, visit
