OrbisResearch.com has published new research report on "Global Application Delivery Controller Market Research Report and Forecast to 2022" to its database.

DALLAS, TEXAS, UNITED STATES, June 13, 2017

/EINPresswire.com/ -- According to Statistics MRC, the [Global Application Delivery Controller \(ADC\) Market](#) is accounted for \$4.08 billion in 2015 and is expected to reach \$9.82 billion by 2022 growing at a CAGR of 13.3% from 2015 to 2022. An ADC is a device that is typically placed in a data center between one or more applications and the server's firewall. It is suite of technologies that provide security, application availability, visibility and acceleration. The key drivers impacting the ADC market growth include swiftly growing threat landscape, rising data center traffic and enhancing efficiency by integrating ADC into enterprise IT systems. Moreover, increasing requirement for cost effective networks will further foster the ADC market growth. However, stringent government regulations and network complexity will reflect the market strength across the globe.
