

Orthodontic Headgear Market is estimated to witness a higher growth figures at CAGR of 5.5% by 2022

Orthodontic Headgear Market Information, by Product Type (cervical pull, high-pull headgear, reverse-pull (facemask)) by End-users - Forecast till 2022

PUNE, MAHARASHTRA, INDIA, June 15, 2017 /EINPresswire.com/ -- Market Highlights

It has been observed that global orthodontic headgear market is growing swiftly and is anticipated to grow tremendously at the CAGR of 5.5%. Globally there is huge demand for orthodontic headgear in various regions. Factors influencing this market are increasing demand of device over surgeries, increasing advanced technology being used in orthodontic headgears market, overcome painless surgeries products and many others.

Angle Orthodontist sent an online survey to randomly chosen 1000 orthodontists where it was found that only 948 orthodontists which includes 62% of the orthodontists revealed that they were using headgear in their practice. During the same survey about 50% of the professionals stated that the trend of using headgear had been practiced from the time they were introduced and till date the practice of using this has been constant. However, 70% of the nonusers indicated that the trend had decreased significantly. About 70% of orthodontists in both groups stated that the trend has been steady in the use of headgear by other orthodontists in the market.

Segmentation

There are different types of orthodontic headgears, which can give desired result as per the situation. Different types of orthodontic headgear are designed as per individual needs, according to which the most appropriate type of headgear is used for the treatment. The main aim in orthodontic headgear treatment is to move the teeth to a position that is more beneficial with respect to functionality. In cases of jaw growth problems the orthodontic treatment is done for adjusting and properly directing the jaw development.

Global orthodontic headgear market has been segmented into type of devices which includes cervical pull, high-pull headgear, reverse-pull (facemask).

A variety of dental appliances are used for treatment, depending on the type of problem and

magnitude of the same.

The most commonly used are cervical pull type which has global orthodontic headgear's largest market share by product. It had largest market share in 2016 which is expected to continue till 2022.
