PUNE, MAHARASHTRA, INDIA, June 17, 2017 /EINPresswire.com/ -- [Insomnia](#) is a common sleep disorder. It was estimated that approximately 30 -35% of global population is suffering from this disorder. Disturbance in sleep frequently awaking or difficulty in returning to sleep after awaking are the major complication in insomnia. Treatment of insomnia is given on the basis of the condition or severity of disease. Low dose of antidepressant and no benzodiazepine are normally administer. Increasing social stress, more workload and thinking about future are the major reasons for increasing symptoms like insomnia. Women are more likely to suffer from this disorder. [Global insomnia market](#) is growing at a steady rate during past few years and is expected to grow at a CAGR of 4.5% in coming future. Insomnia drug have found its application in treatment of other diseases like Alzheimer's and Parkinson disease which has help to boost the market of insomnia. The [insomnia market](#) is hampered due to patient expiry of Sunovion in 2014 which was a top selling insomnia drug. However the new launches of product like Belsomra by Merck & Co. Inc and E-2006 by Eisai Co. will help to increase the market in coming future. The major driving factor for the insomnia market are increasing number of mental disorder, increase in patient suffering from Alzheimer's and Parkinson's disease, increasing workload and stress. Lack of awareness and education, and challenge to provide a cheap drugs compare with other brand can be responsible hampering the market growth.
