About Tinea Pedis Treatment

Tinea pedis, also known as athlete's foot, is caused by dermatophyte fungus on foot and can spread to toenails and hands. It is a dermatophyte infection of the soles of the feet and the interdigital spaces. Tinea pedis thrives in warm, humid conditions and is most common among young adult men. Tinea pedis can be transmitted through direct contact with an infected person or by touching surfaces contaminated with the fungus. This fungus lives in warm, moist environments and is found in showers, locker room floors, and swimming pools.

The analysts forecast the global tinea pedis treatment market to grow at a CAGR of 3.03% during the period 2017-2021.
