Description

Digitizers make the digital artwork easier and more accurate. Drawing with a mouse is not ideal and often difficult. The most popular type of digitizer is digitizers without display. They consist of a flat pad and have a specialized digital pen. They are highly preferred by architects and animation designers. The other types of digitizers are embedded display digitizers. In this type of digitizers, the user can directly draw on the screen. They are highly preferred by hobbyists such as artists. The high cost of these digitizers is the major reason for their low deployment across different industries.
