Description

Global Construction Equipment market is expected to grow from \$140.21 billion in 2015 to reach \$228.74 billion by 2022 with a CAGR of 7.2%. Raising infrastructural activities around the globe, steady economic growth, and increasing investment activities from governments are the major factors fostering the market growth during the forecast period. In addition, rising population & rapid urbanization are the factors favouring the market growth. However, fluctuating construction material costs, environmental issues are hindering the market growth.

By industry, public works & rail road segment commands the global market due to increasing investments from governments to develop infrastructure in their countries. By application, earth moving segment is anticipated to be a largest segment during the forecast period. Asia pacific is expected to dominate the global market with a higher CAGR over the forecast period. The growth is attributed to raising population & rapid urbanization, raising demand for better transportation and infrastructure.
