Global Wet Waste Management Market Information Report by Waste Types (Food Scrap, Agricultural Waste, Medical Waste, Others), By Service & Equipment

PUNE, MAHARASHTRA, INDIA, June 20, 2017 /EINPresswire.com/ -- segregated as biodegradable and non-biodegradable. Wet waste management is the process of composting the waste for use as manure, biogas etc.

The [global wet waste management market](#) is majorly driven by the rising awareness for wet waste management. The market is also driven by the introduction of new wet waste management technologies such as the waste to energy solutions. Awareness for environmental sustainability and increase in the use of eco-friendly fuels in the residential and commercial segments, are contributing to the growth of the market. Rise in government initiatives for spreading wet waste management awareness, is further expected to propel the market growth. However, the growth of this market is restrained by lack of participation from industries and sectors such as commercial, food & beverage, and healthcare. Lack of treatment plants and landfill sites is also projected to hamper the growth of the global [wet waste management market](#) over the forecast period.
