

Imperial Systems, Inc. Partners with Cutting Systems Inc.

Cutting Systems Inc. will exclusively install CMAXX dust collection systems with their equipment.

JACKSON CENTER, PA, USA, June 21, 2017 /EINPresswire.com/ -- [Cutting Systems Inc.](#) provides cutting solutions to meet any need and budget, along with outstanding customer service. They offer new precision cutting machines, and they also remanufacture or retrofit all makes and models of existing machines. They specialize in customizing cutting equipment to meet each customer's specific needs. Hypertherm systems add industry-leading cutting power. With their focus on customer service and after-care, CSI looked for a partner with the same values. They found Imperial Systems, offering extensive experience in designing dust collection for cutting systems. The quality of the CMAXX collector, with its heavy-duty design, reliability, and ease of maintenance made CSI confident that their customers would be satisfied with their entire system from cutting table to dust collector.

"Our companies share a strong focus on customer support and ongoing relationships," says president and CEO of Imperial Systems, Jeremiah Wann. "With this partnership, companies who purchase a cutting system from CSI can be confident that they'll get great service and after-care for the entire system, including the dust collector."

“

It's important for us to have partners all over North America, but also partners close to home."

Jeremiah Wann

Both companies are also excited with the opportunity to partner locally, with CSI based in Cleveland, OH and Imperial Systems in nearby Jackson Center, PA. "It gives both of us the chance to support and help build up another local business," says Jeremiah Wann. "It's important for us to have partners all over North America, but also partners close to home."
