

VIA Announces VIA Mobile360 Surround View Sample Kit

Provides real-time in-vehicle 360° remote monitoring, recording, and tracking capabilities in a highly-integrated solution with flexible customization options.

NEW TAIPEI CITY, TAIPEI, TAIWAN, June 22, 2017 /EINPresswire.com/ -- VIA Technologies, Inc., today announced the launch of the [VIA Mobile360 Surround View](#) Sample Kit for real-time commercial 360° video vehicle monitoring, recording, and tracking applications.

The kit combines a ruggedized in-vehicle system featuring an integrated 4G modem and GPS for remote wireless tracking and monitoring with four automotive-grade FOV-190 cameras and a 7" automotive-grade 720P P-Cap touch monitor with VESA mount support.

The VIA Mobile360 Surround View system harnesses VIA Multi-Stitch Technology to seamlessly combine the camera feeds on the fly and create an all-encompassing 360° view that can be displayed locally or remotely. It also features VIA Mobile360 E-Track, a cloud portal that enables fleet owners to collect and organize vehicle and driver data for real-time vehicle tracking, event and data recording, and asset management.

“

By providing drivers with a comprehensive view of their immediate environment, the system helps not only to prevent accidents caused by blind spots but also to improve vehicle maneuverability.”

*Richard Brown, VP
International Marketing, VIA
Technologies, Inc.*

A variety of customization options are available to expand functionality through the integration of up to two additional FOV-190 or FOV-50 cameras. These include Enhanced Surround View for boosting 360° video capture and stitching capabilities on longer vehicles; Partial ADAS for the front/rear or right/left sides of the vehicle; and Computer Vision for extra E-Track capabilities such as driver monitoring, cargo monitoring, and license plate recognition.

“With its robust yet highly flexible design, the VIA Mobile360 Surround View Sample Kit can be deployed in commercial vehicles of all types and sizes – ranging from semis and delivery vans to excavation equipment and heavy machinery,” said Richard Brown, VP International Marketing, VIA Technologies, Inc. “By providing drivers with a comprehensive view of their immediate environment, the system helps not only to prevent accidents caused by blind spots but also to

improve vehicle maneuverability in dense urban spaces and demanding terrains.”

Availability
