Synopsis

Essential resource for top-line data and analysis covering the global real estate market. Includes market size data, textual and graphical analysis of market growth trends and leading companies.

Key Highlights

- The real estate industry looks at renting and leasing residential properties. The industry is valued using the total revenues generated by landlords via the leasing and renting of private and council properties. Values are calculated using the average annual rent multiplied by the number of rented properties. Volume includes number of houses/properties rented out (vacant properties excluded). Leading companies relate to companies that are involved in residential property rental and development business. Any currency conversions used in the creation of this report have been calculated using constant annual average 2016 exchange rates.
- The global real estate industry had total revenues of \$3,505.2bn in 2016, representing a compound annual growth rate (CAGR) of 4% between 2012 and 2016.
- Industry consumption volume increased with a CAGR of 2.9% between 2012-2016, to reach a total of 525.8 million housing units in 2016.
- The industry was mainly driven by emerging urbanization trends in Asia-Pacific which has been the most important factor of demand in countries such as India and China. In contrast, record-low interest rates in Europe that increased mortgage-lending, especially in Northern Europe, did not help the industry to achieve strong growth rates. In the US, the positive outlook the economy has led to property value increases that had a transmission effect in the domestic industry.

Scope

- Save time carrying out entry-level research by identifying the size, growth, and leading players in the global real estate market
- Use the Five Forces analysis to determine the competitive intensity and therefore attractiveness of the global real estate market
