PUNE , MAHARASHTRA, INDIA, June 22, 2017 /EINPresswire.com/ -- [IT Robotic Automation Industry](#)

Description

According to Statistics MRC, the Global IT Robotic Automation Market is growing at a CAGR of 60.9% during the forecast period 2015 to 2022. Cost benefits and enhanced efficiency over manual process handling, growing recognition in finance and accounting segment, ability to leverage other application software without integration are some of the key factors driving the market growth.

Business Process Outsourcing (BPO) is one of the major segments in the IT industry where high acceptance of robotic process automation is expected in the coming years. In 2015, North America and Europe were the key contributors to the global IT robotic automation market. Major companies offering RPA tools witness the U.S. as a prospective area for the development of RPA technology. The market has a vast opportunity to develop with the execution of robotic process automation in application and infrastructure management.
