Key Findings

- The global market for cyber security is expected to increase from US\$11.9 billion in 2016, to US\$18.5 billion by 2026, representing a CAGR of 4.51%. On a cumulative basis, the global spending on cyber security sector is estimated to be US\$171.8 billion during 2016-2026. Over the forecast period, the Network Security segment is expected to account for 43% of the market, while Data Security and Identity & Access segments (includes investment in ancillary and support activities) are expected to account for shares of 25% and 17%. The remaining 15% of market share is expected to be accounted for by the cloud security segment.
- The cyber security market in the North American region is estimated to account for 57% of the global expenditure on the sector. Asia-Pacific and Europe are also expected to account for a significant portion of the total cyber security market during the forecast period, with shares of 20% and 12% respectively.
- Latin America, the Middle East, and Africa cumulatively account for 11% of global cyber security expenditure.

Synopsis

Increased threats of terrorist attacks, the need to secure maritime and offshore installations, and the growing vulnerability of IT and communication networks to hacking are expected to drive expenditure. Moreover, accelerating risks of terrorist attacks is also driving investments in the global cyber security market. Furthermore, dynamic nature of cyber threats warrants increased spending on innovative technologies, which has resulted in numerous initiatives undertaken by governments and military

worldwide.
