[Global Balanced-armature Magnetic Speakers Market](#)

Description

Balanced Armature Speakers are based on balanced armature technology (BAX) and are utilized in a variety of high performance audio and communication products. Balanced armature drivers use an electronic signal to vibrate a tiny reed that is balanced between two magnets inside a tiny enclosure. The motion of the reed is transferred to a very stiff aluminum diaphragm. This diaphragm is free of resonances in the audio band, allowing it to produce excellent clarity.
