

# Fab Materials 2017 Global Market Expected to Grow at CAGR Of 6.99% and Forecast to 2021

*Wiseguyreports.Com Publish New Market Research Report On-"Fab Materials 2017 Global Market Expected to Grow at CAGR Of 6.99% and Forecast to 2021".*

PUNE, INDIA, June 23, 2017 /EINPresswire.com/

--

## [Fab Materials Market 2017](#)

### Executive Summary

Fab materials are chemicals that are used in semiconductor fabrication processes such as etching, oxidation, deposition, and planarization. They are classified into two types, fab materials and packaging materials. Fab materials are used in different stages of the fabrication process such as etching, oxidation, deposition, and planarization, whereas packaging materials are used specifically for packaging purposes to increase the reliability of semiconductors.

The analysts forecast the global fab materials market to grow at a CAGR of 6.99% during the period 2017-2021.

### Covered in this report

The report covers the present scenario and the growth prospects of the global fab materials market for 2017-2021. To calculate the market size, the report presents a detailed picture of the market by way of study, synthesis, and summation of data from multiple sources.

The market is divided into the following segments based on geography:

- Americas
- APAC
- EMEA

Request a Sample Report @ <https://www.wiseguyreports.com/sample-request/1309359-global-fab-materials-market-2017-2021>

The report, Global Fab Materials Market 2017-2021, has been prepared based on an in-depth market analysis with inputs from industry experts. The report covers the market landscape and its growth prospects over the coming years. The report also includes a discussion of the key vendors operating in this market.

#### Key vendors

- Air Liquide
- Hitachi Chemical
- Fujimi Incorporated
- The Linde Group
- Solvay

#### Other prominent vendors

- Avantor Performance Materials
- AWE
- BlueStar New Chemical Materials
- Dow Chemical
- Honeywell International
- JSR
- KANTO KAGAKU
- KMG Chemicals
- Merck
- MITSUBISHI GAS CHEMICAL
- MITSUI CHEMICALS AMERICA
- PiBond
- Praxair
- SACHEM
- Shin-Etsu Chemical
- Sumika Electronic Materials
- SUMCO
- TOKYO OHKA KOGYO
- Versum Materials
- Wacker Chemie

#### Market driver

- Increase in use of industrial gases in semiconductor materials market
- For a full, detailed list, view our report

## Market challenge

- Challenging market for semiconductor manufacturing in India
- For a full, detailed list, view our report

## Market trend

- Advent of artificial intelligence, leading to advances in semiconductors
- For a full, detailed list, view our report

## Key questions answered in this report

- What will the market size be in 2021 and what will the growth rate be?
- What are the key market trends?
- What is driving this market?
- What are the challenges to market growth?
- Who are the key vendors in this market space?
- What are the market opportunities and threats faced by the key vendors?
- What are the strengths and weaknesses of the key vendors?

## Table of Contents

PART 01: Executive summary

PART 02: Scope of the report

PART 03: Research Methodology

PART 04: Introduction

- Market outline
- Fabrication process
- Chemical composition of fab materials

PART 05: Market landscape

- Market size and forecast
- Five forces analysis

PART 06: Market segmentation by type

- Global fab materials market by type
- Global fab materials market by silicon
- Global fab materials market by electronic gases
- Global fab materials market by photomasks
- Global fab materials market by photoresist ancillaries

- Global fab materials market by CMP
- Global fab materials market by others

#### PART 07: Geographical segmentation

- Global fab materials market by geography
- Fab materials market in APAC
- Fab materials market in Americas
- Fab materials market in EMEA

#### PART 08: Decision framework

#### PART 09: Drivers and challenges

- Market drivers
- Market challenges

#### PART 10: Market trends

- 3D NAND technology in semiconductor devices
- Rise of Internet of Things (IoT)
- Advent of artificial intelligence, leading to advances in semiconductors
