[Industry Check Valves Market 2017](#)

Executive Summary

Valves are devices that control, direct, and regulate the flow and pressure of gases, liquids, and fluidized solids. Globe valves, gate valves, butterfly valves, ball valves, and safety-relief valves among others are used in various process industries such as oil and gas, chemical, power, refining, water and wastewater, and food and beverage. They can be operated electrically, pneumatically, and hydraulically.

Check valves allow gases or liquids to flow through only one direction. The prevention of flow reversal that could damage the system or the equipment is the main purpose of check valves.

The analysts forecast the global industry check valves market to grow at a CAGR of 4.52% during the period 2017-2021.
