## Market Forecast

Increasing demand for functional food along with rising health consciousness among people in developed countries is driving the growth of dietary fiber market. Change in lifestyle and food consumption habits will influence the market growth. Number of health-benefits associated with consumption of dietary fiber such as regular defecation, more control on blood sugar levels, reducing risk of colorectal cancer will also boost the growth of market.

These factors will play a key role to grow dietary fiber market at CAGR of 6.5% during forecast period.

#### Downstream Market Analysis-

Dietary fiber has many health benefits. It can reduce risk of heart disease, diabetes cancer and also help to control the weight. The major consumer of dietary fiber is sports person, athletes and young adults. Intake of soluble dietary fiber benefits patients with diabetes mellitus and hyperlipidemia. Dietary fiber is majorly used in functional food as an ingredient as it provides water holding capacity, viscosity, gel-forming ability and fat-binding capacity to food products.

Access the market data and market information presented through more than 60 market data tables and 25 figures spread over 110 numbers of pages of the project report "Dietary Fiber Market - Forecast to 2022"

#### Regional Analysis

The Global Dietary Fiber Market is segmented into North America, Europe, Asia Pacific, and Rest of the World (RoW). Amongst these, the North America holds largest market share followed by Europe. The low fiber content in American diet has boosted the dietary fiber market in North America. APAC is fastest growing region due to changing lifestyle and improved disposable income in that region. The consumption of dietary fiber in developing countries like India, Brazil and China is expected to grow in upcoming years.
