About Ports and Terminal Operations, Ports and terminal operations refer to the various activities that are carried out by terminal operators whenever any vessel or ship arrives with the cargo. Operations such as loading and unloading of container ships docked at their terminals. The transfer of cargo after unloading to the vehicle responsible for its carriage to the destination, yard, or storehouse is carried out at the port. The primary drivers for the global ports and terminal operations market include the growth of containerization, increase in the regional trade, and increase in the use of IoT solutions in the port industry. All these factors are highly supported by the government's initiative and policy.

Analysts forecast the Global Ports and Terminal Operations Market to Grow at a CAGR Of 2.09% During the Period 2017-2021.
