Key Findings

- Mobility is aiding the functioning of the IoT environment by offering wider connectivity with the use of new technologies, turning information into actions that enable companies to remain competitive, develop new capabilities, and create rich mobile experiences.
- The sheer pace of growth in mobile traffic has forced organizations across industries to create a unified mobile strategy.
- With the bring your own devices (BYOD) trend becoming more prevalent in enterprises, there has been an exponential increase in the proliferation of mobile devices.

Synopsis

This Strategic Focus report analyses the current trends, drivers, and inhibitors impacting the enterprise mobility management market. The report outlines the evolution of enterprise mobility management technologies, and identifies and assesses the best performing vendors in the market. This report also presents Kable's view of the revenue opportunities in the enterprise mobility management market through to 2020, highlighting the market size and growth by technology, geography, sector and size band.
